

space for success

Thuringian company Jena-Optronik, with 250 employees, is a true pioneers in the space Industry:

- Attitude and orbit control sensors for satellites and spacecrafts: Rendezvous sensors, Star sensors and Sun sensors; more than 450 sensors have been delivered for space missions to date.
- Space optics and electronics for Earth observation satellites

Jena-Optronik, a subsidiary of Airbus Defense and Space, is a partner in demand globally, both for the world's biggest space agencies as well as for almost all the large aerospace system companies in Asia, Russia, Europe and North America. These leading aerospace system companies rely on the products made in Jena/Thuringia and use them in their most critical missions.

Jena-Optronik GmbH is DIN EN 9100:2018 certified.
